

DEVIL FRUIT:

Devil Fruits are mysterious, distinctive fruits scattered throughout the world, known for permanently granting their eaters superhuman powers and an equally permanent inability to swim. With only one notable exception, an individual can only acquire the powers of a single Devil Fruit and survive.

May or may not be the flag: 

Each Devil Fruit grants a special power to anyone who eats it, from the simplest powers possible, such as stretching like rubber, to powers capable of causing large-scale destruction like creating earthquakes. Each Devil Fruit is unique, and there is no other like it; that is, there is no (natural) Devil Fruit that has the same power as another. These fruits are broadly grouped into three classes: **Zoan**, which allows a user to transform into an animal as well as an animal hybrid; **Logia**, which grants a user the power to create, control, and transform their body into a natural element; and **Paramecia**, which offers any of a vast array of strange abilities that do not fit into the other two categories.

Maybe the flag: 

Devil Fruits have empowered many of the world's most significant individuals, especially among the **Three Great Powers**. This, along with their general rarity, causes them to be highly sought-after; single specimens may be valued at hundreds of millions in **Belly**, and extensive efforts have been made to mass-produce artificial versions for warfare
